

Advancing aircraft ground security

PreFlite system upgrade

Key upgrade features

- More reliable, new radar-based wheel well sensors don't require complicated aiming
- Easy to use—system calls or sends a text message to your phone to report intrusions
- No range limit—works anywhere there is GSM coverage
- No remote/transponder to carry—arm, disarm and check status right from your phone

Securaplane's existing systems can be easily upgraded to the PreFlite system.

System 500 upgrade:

- > Replace PCU
BP-550 or BP-650 is replaced by PCU-01
- > Replace antenna
New cell phone antenna (SSA-01) replaces existing CD-571 UHF antenna.
- > Replace wheelwell sensors
RCR-01 range controlled radar sensors replace existing passive infrared (PIR) sensors.

System 450 or Ultra-Lite upgrade:

- > Replace PCU
BP-450, -460, or -850 is replaced by PCU-01
Minor wiring additions to support antenna and data bus
- > Install antenna
Install new cell phone antenna (SSA-01)
- > Replace wheelwell sensors
RCR-01 range controlled radar sensors replace existing Passive Infrared (PIR) sensors.
