

Miniature magnetics

OECO's custom-produced miniature magnetics products perform crucial tasks in demanding environments, including those of implantable medical devices, the space shuttle, the Trident missile and Boeing 777s.

OECO's success with these applications underscores our unsurpassed expertise in designing and manufacturing magnetics, including the production of over one million miniature magnetics.

OECO has demonstrated the ability to successfully and continuously produce a product wound with 50 AWG wire. The development of the surface mount 1/4" cube allows OECO's customers to meet critical performance requirements.
